Sir:

The following preliminary amendment and remarks are respectfully submitted in connection with the above-identified application.

In the Claims:

Please add the following claim:

--83. The image display device according to claim 79, wherein at least two devices are combined into a multi-structure by the connector to which said third end face is connected and are placed with its back kept up against the wall, the heat being exhausted out of the cabinet to the outside through the left- and right-hand slanting surfaces, and said wall coupled by said connector being used as a heat exhausting duct in the vertical direction.--
